Nice to know

MAIN THEME FOR 2023: UTOPIA. Live. Believe.

TTG - INOUT 2023, Italy's leading marketplace for tourism and hospitality, has chosen Utopia as its main theme this year.

The term Utopia, understood in its positive meaning, emerges when used in the sense of a realisable ideal. It is no coincidence that the iconic phrase chosen to accompany the 2023 theme is borrowed from Oscar Wilde and emphasises how utopian thinking can culminate in full realisation, recalling that "Progress is the realisation of Utopia".

The tourism and hospitality industry is currently undergoing a transformation. No longer simply a means of escapism and a showcase of beauty, the travel product is changing to meet the new challenges posed by the modern world. Companies in the sector are taking a fresh look at a time that sees them directly involved in the fight against climate change, gender inequality and the energy emergency. It is the era of Utopia, understood as creativity geared towards the profound transformation of services, products, communication and sales strategies.

The theme is represented by a visual in which a golden spiral – always been a symbol of harmony and perfection – is superimposed on an image created with fractals, the result of the interaction between human art direction and artificial intelligence. This union between the rationality of Greek thought and cutting-edge creative design gave rise to a generative spiral of multiple, possible utopian worlds inspired by a new order for the development of the industry, businesses and products.
